RESOURCES TO EMPOWER TEACHERS AND LEARNERS

We're excited to announce that our partnership with Concordia Primary School in Concordia has helped create a more dynamic learning environment. Through our ABCD Grant, we've funded the installation of two interactive whiteboards, bringing technology into the classroom and enhancing the educational experience for 659 learners.

"The new boards are amazing! I can make notes while teaching, and the children are much more engaged, especially when we watch subject-related videos. It has changed the dynamic in the classroom, particularly in mathematics, where the school has previously struggled," - Ms. Chante Van Wyk, a teacher benefitting from the whiteboards.

"My grandson passed maths for the first time, and I believe it's thanks to the interactive whiteboards now available in his classroom. I'm deeply grateful to Kangnas for their support in bringing this technology to the school, it's already making a difference in our children's futures." - Murtal Thomas, a community member.

NEW CLINIC SIGNAGE FOR LOCAL COMMUNITIES

On 11 October, representatives from the wind farm and the Department of Health gathered to celebrate the handover of new signage for five local clinics, a key milestone in helping them meet Ideal Clinic standards and ensuring high-quality healthcare for the community.

"Proper signage is a key requirement for clinics to achieve this status, but many of our facilities have struggled to comply due to a lack of funding-until now.

"The newly installed signage boards will help these clinics comply with national healthcare standards and also improve the visibility and accessibility of the facilities for local residents." - Rouchet Daniels.

PROMOTING UNITY THROUGH SPORTS

We partnered with the Namakwa Sports Council to sponsor a series of exciting local rugby and netball tournaments. The sponsorship provided medals, trophies, and prize money to recognise the dedication and talent of our athletes.

"Sports are key to youth and community development, fostering teamwork, leadership, and healthy lifestyles." - Rouchet Daniels.
